

Manufacturing

Kratos employs some of the most advanced engineering and manufacturing professionals combining craftsmanship with cutting edge technology, including 3-D manufacturing.

Evaluate Us By Those We Serve

When all is said and done, do evaluate us on the quality of our trainers, the thoroughness of our course development and the depth of our support and sustainment; but most importantly—evaluate us on the quality of the warfighters we have helped train for the Air Force, Army, Marine Corps, Navy and Allied Forces.

About Kratos

Kratos Defense & Security Solutions, Inc. develops transformative, affordable technology for the Department of Defense and commercial customers. In addition to advanced training solutions and systems, Kratos specializes in unmanned systems, satellite communications, cyber security/warfare, microwave electronics, missile defense and combat systems.

KRATOS

Advancing Immersive Reality Training Technologies

Kratos is committed to integrating advanced immersive reality technologies into our course curricula. When integrated with integrated motion base platforms, hoist and weapons simulators give the user a full immersive experience of aircrew operations.

Helmet-Mounted Display

Actual Environment

Mixed reality (the coexistence of virtual and real environments) training solutions deliver greatly enhanced training for a wide variety of battlefield and support functions. With its ability to replicate dangerous warfighter scenarios mixed reality can help improve survivability through enhanced training, tailor displays to each combatant role...and make sure that the first warfighting experience will be virtual...not real.

Blending the Best of the Digital and Physical Worlds

Kratos Blended Training offers a unique combination of computer based training and replicated physical controls all within an immersive physical environment. This approach helps students advance along the training continuum by providing a cost effective bridge between computer-based training (CBT) and Part-or Full-Task trainers.

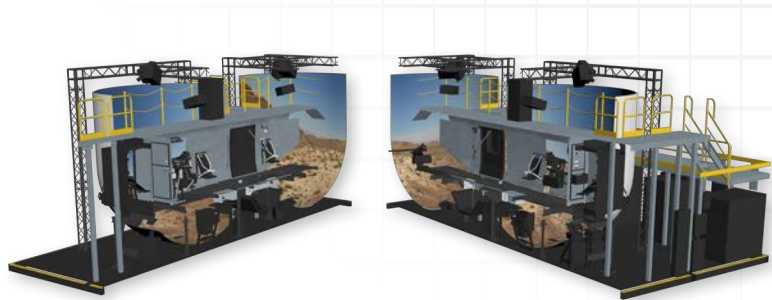

Maintenance Blended Reconfigurable Aviation Trainer (MBRAT)

Kratos' Maintenance Blended Reconfigurable Aviation Trainer (MBRAT), is a revolutionary concept in part-task trainers that creates an immersive physical, visual and tactile environment.

State-of-the-Art Aircrew Trainer Legacy

Kratos has delivered over 100 trainers to the Army, Navy, Marine Corps and Air Force that combine virtual and physical components to maximize training realism: These include the **Aircrew Virtual Environment Trainer (AVET)** and **Naval Aircrew Training Systems (NATS)** for the aircrews of the MH-60S and R platforms and, the **Aircrew Training System** for the KC-46 military aerial refueling and strategic transport aircraft and the Marine Common Aircrew Trainer (MCAT), a unique trainer supporting three platforms.

MCAT's unique configuration enables training on three platforms

Aircrew Training System for the KC-46

Aircrew Training Center

High-fidelity simulation systems can cost millions of dollars to own and sustain. When budget or process constraints prevent you from acquiring one, the same training excellence can be achieved by training on a variety of full-mission simulators in the **Kratos Aircrew Training Center (KATC)**.

Mixed reality gunnery training in KATC

Ground Crew Training Solutions

Kratos possesses extensive subject matter expertise and intellectual property for a broad range of ground crew training devices and courseware for tank, weaponry, rocket, and fighting vehicle training.

A sampling of Kratos Training Solutions includes:

- The **Abrams M1 Maintenance Training Solution (MTS)**
- The **HIMARS UFCS AMTS** (High Mobility Artillery Rocket System Universal Fire Control Systems Advanced Maintenance Training System)
- The **Bradley Fighting Vehicle System (BFVS) Hands On Trainer (HOT)**

Total Training Solutions Require Total Training Support

Kratos supports the training continuum with:

- **Courseware Design and Development:** Dynamic custom training solutions utilizing state of the art technology
- **Workforce Analysis:** competency profiles that reflect mission objectives

The HIMARS UFCS AMTS

- **Front-End Analysis:** Identify and mitigate training gaps
- **Learning Management:** assistance with selection, implementation, connectivity and operation
- **Acquisition Support:** positions Program Managers for successful acquisitions
- **Sustainment Services:** life-cycle maintenance for Kratos-designed and third party systems, in some cases including all source files.
- **Operate and Maintain Training Systems** with Kratos Global Contractor Logistics Support (CLS)
- **Increase Training Effectiveness** with Kratos Contractor Instructional Support (CIS)
- **Make effective, risk-based, strategic decisions** with Kratos Global Contractor Support Services (CSS)

Instructional Excellence Enhances Readiness

Kratos delivers full-spectrum learning solutions that include:

- **Gaming and Simulations** ranging from IT technology to ground and air weapons scenarios
- **Web and Technology-Based Courseware** Integrates rich content experiences, social media, interactivity and assessment opportunities
- **Instructor-led Training solutions** use a variety of metrics and feedback mechanisms instructors to view real time student performance and provide remediation to students falling behind
